Profile

Full Stack Developer specialized in **Java/Spring Boot** and **React**, experienced in building scalable financial and accounting applications. Strong track record of improving performance, modernizing legacy systems, and delivering high-impact features across frontend and backend. Known for **collaborating effectively in cross-functional, international teams**, taking ownership of complex technical domains, and maintaining high delivery standards in both office and remote environments.

Work experience

Full Stack Software Developer, Admisol, Ghent, Belgium

Oct 2023 — Apr 2026

- Developed and maintained React frontends and Java/Spring Boot backends used by **2,000+ clients**, collaborating closely with product and support teams.
- Built a complete **React admin panel** independently, reducing internal management time by **90%** and enabling smoother team workflows.
- Took ownership of the **Peppol e-invoicing integration**, delivering **20+ new features** and supporting teammates during implementation and onboarding.
- Modernized legacy services by upgrading Java versions and dependencies across **7+ modules**, significantly reducing technical debt and improving stability.
- Migrated document storage to cloud buckets, lowering storage costs by **~90%** and improving internal processes for multiple teams.
- Delivered **150+ new features** and resolved **60+ user-reported issues**, contributing directly to product quality and customer satisfaction.
- Collaborated effectively in distributed setups, maintaining strong communication and consistent delivery during a **3-month remote period in Barcelona**.

Full Stack Software Developer Intern, Lemonade, Barcelona, Spain

Feb 2023 — Jun 2023

- Migrated a legacy AngularJS mailer application to **React**, improving load time by **50%** and reducing maintenance overhead for the team.
- Built **6+ reusable React components**, enhancing UI consistency and increasing team development speed.
- Improved and extended the Node.js backend, optimizing workflows and reducing processing time by **70%**.

- Collaborated daily with an international team, adapting quickly to their workflow, standards, and communication practices.

Fullstack Developer (IT Project), Elision, Hasselt

Nov 2022 — Jan 2023

- Built a webshop using **Next.js** and **Spring Boot** as part of a student team, ensuring stable end-to-end functionality.
- Integrated the **Adyen payment platform**, enabling secure, reliable payment processing for the project.
- Worked closely with teammates to align frontend and backend architecture and resolve integration challenges.

Java Developer Intern, Data Solutions sa, Ehlerange, Luxembourg

Feb 2021 — Mar 2021

- Assisted in developing and maintaining **Java applications**.
- Implemented new features and updated existing functionality based on user needs and team requirements.
- Gained experience with enterprise development practices and collaborative workflows.

Education

Professional Bachelor of Applied Computer Science, PXL, Hasselt, Belgium

Sept 2020 — Jul 2023

Additional academic experience at **TU Delft** and **UHasselt** in Computer Science

Computer Science, Secondary School, Ensorinstituut, Ostend, Belgium
